TECHNOLOGY SERVICES

# Rainbow Technology Services 's Integrity & Compliance Guide Document which we as a company and every individual follows and we have committed to this principles

Our understanding and commitment to **Integrity In the work Place** :

- Employers and business leaders can benefit from integrity in the work place .
- Integrity involves moral judgement and character ,honest and leadership values.
- Individual who show integrity in workspace not only understand right from wrong but they practice it in all they do.
- This is beneficial in a business environment where trustworthy actions set the foundation for successful business relationship.
- We at Rainbow Technology Services adhere to this principle in all aspect of our business .

# Rainbow Technology Services 's compliance & Adherence to Foreign Corruption Act (FCPA) and understanding of its practices

- Anti Bribery Requirements Prohibit:
  - The FCPA prohibits providing or even offering “anything of value” to government officials to improperly influence them. Anything of value is very broad -- examples include cash, computer equipment, meals, entertainment (e.g. tickets to a game or concert), travel, even if it is to attend a business conference.
  - ... It can even be offering a job or internship for a family member of a government official. Sometimes regulators focus on very, very small gifts if they're part of a pattern of giving.
- Boks & Records Requirements :
  - In addition, it is important to have books and records that accurately and fairly reflect all of our transactions in reasonable detail and adequate internal controls to prevent and detect any violations of policies.

# We also follow strict Financial Integrity principle

## Accurate Business Records:

- We ensure that all our business records are complete ,accurate and transparent including :
  - Purchase orders from our customers and our invoicing to our customers.
  - Sales report
  - Before we can commence a project we expect to get an official purchase orders from our customer to ensure the legitimacy of the project .
- **Terrorism:**
  - We are not allowed to do any business with any country which is banned by the USA Government and we also wont supply any of our services to any terrorism group of any type named by any government around the world .
  - So Rainbow Technology Services adhere to the strictest rules regarding Terrorism as most of our products services are governed by the laws of the USA

DS  
18

# Avoiding Money Laundering and Funding Terrorist Activities

- Rainbow Technology Services has committed to comply with applicable laws prohibiting money laundering and terrorism financing.
- So we Watch out for the following:
- Be alert for suspicious transactions, such as:
- Payments made in currencies other than the currency specified in the contract.
- Over-payments and requests for refunds
- Unusual fund transfers to or from parties or countries not involved in the deal.

This is part of the certificate which we complete which I have attached as part of the compliance policy
